**EXCLUSIVE WORLDS OF FABRIC SEE

DESIGN

The 3-D effect of the fabric offers a special visual and touchable experience. The CBA fibers (Clear Brilliant Acrylic) stands for excellent properties and is particularly smooth in contrast to conventional materials. The result is a fabric with an extremely dense surface that is particularly dirt-repellent and whose colors therefore shine brighter and longer. The fabric is also particularly water-repellent and offers very high UV protection.

To further underline the uniqueness, 10 different EXCLUSIVE designs have been developed, which are exclusively available from STOBAG and offer an aesthetic treat.

THE VALANCE SHAPES

The recommended valance height is 5.9"–7.9", depending on the type of awning. The valance cut-out is adapted to the corresponding repeat width. For technical reasons, a manufactured valance subsequently can show repeat deviations of up to 2.4". Important! Specify the valance number when ordering. Without specification, standard valance No. 50 is supplied.

THE EDGING TAPE FOR THE VALANCE

The valance has a hemmed edging tape to create a particularly beautiful appearance. Therefore it is important to always indicate the desired binding tape number when ordering fabrics. If no information is provided, the recommended edging tape as shown in this brochure will be used.

PERFECTLY COORDINATED

FRAME COLORS

With 14 CLASSIC- and 20 LIFESTYLE colors, a wide range is available that leaves nothing to be desired.
