# VIVO TRILLIANT

The modular awning that  
redefines premium outdoor living.

## VIVO TRILLIANT DESIGNED FOR ANY BUILDING REQUIREMENT

Enjoy elegant, high-performance shading – perfect for your terrace, garden patio, or balcony. VIVO TRILLIANT adapts perfectly to your space.

- Widths up to 23' (7 meters)
- Projections up to 13' 1" (4 meters)

### TAILORED TO YOUR NEEDS – INDIVIDUAL AND VERSATILE

Created for you. Take control of how your Awning looks and preforms. From weather protection and front bars to fabric color, texture and surface finish – every VIVO TRILLIANT is a custom creation, tailored to your wishes.

### FLEXIBLE AND EXPANDABLE

VIVO TRILLIANT can be easily expanded at a later date. It's modular design allows for the seamless integration of additional features.

## VIVO TRILLIANT REDEFINING AWNING INNOVATION

VIVO TRILLIANT sets a new benchmark in awning design, seamlessly combining advanced engineering with sophisticated aesthetics. At the heart of this innovation are its patent-pending telescopic arms, developed exclusively by STOBAG. These arms incorporate back-impulse technology, delivering consistent fabric tension at every extension point – even when fully deployed.

Drawing inspiration from the precision-cut facets of a diamond, the system's distinctive Trilliant arm profile lends both its name and its signature style. This unique triangular cross-section not only enhances structural stability but also maintains a sleek, refined silhouette.

VIVO TRILLIANT: where form meets function with brilliance.

### TIMELESS AND REFINED

Experience modern technology perfectly integrated into a compact design. Clean lines and precision surfaces convey strength and sophistication.

### ROBUST AND DURABLE

High-quality materials, such as forged components and GORE® Tenara sewing thread, ensure long-lasting durability and resistance to environmental stressors.

VIVO TRILLIANT IS DESIGNED TO ELEVATE  
THE OUTDOOR LIVING EXPERIENCE.

## OPTIONS FOR WEATHER PROTECTION

### Top board

- The top board protects the fabric against weather and deposit's from plants and animals.
- It's integrated rubber lip seals the wall connection, preventing dirty water from running down the facade.

### Protective sleeve Protect

- The protective sleeve provides full coverage and shields the fabric from UV rays, dirt, and moisture.
- Integrated drainage channels.

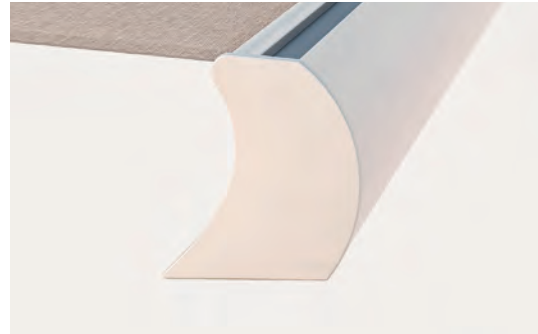

To maintain fabric quality, we recommend retracting the awning only when it is completely dry.

## FRONT BAR

### Reinforced front bar

- The integrated drainage channel diverts light rain away from the seating area.

### Strongest front bar

- This front bar allows space for the drop down valance.
- The drainage channel integrated into the front bar diverts rainwater to the outside.

## OPTIONS FOR SUN PROTECTION

### Drop down valance

- The drop down valance is a flexible protection against low sun, light wind, and for greater privacy.
- This option allows for minimal incline of the awning and maximum clearance.
- With Soltis fabric (up to 5' 3" / 160 cm height), you enjoy an unobstructed view with little visibility from outside.
- The acrylic fabric in the same design as the main fabric conveys a feeling of security.

### Volant

- An additional glare shield for low-angle sunlight.
- The reduced angle offers an open view and airy feel, while also concealing the technical structure.

## EXTEND YOUR LIVING ROOM OUTSIDE AND ENJOY PRECIOUS MOMENTS

VIVO TRILLIANT offers more than just comfort and protection – it's also an investment in the long-term value of your living space.

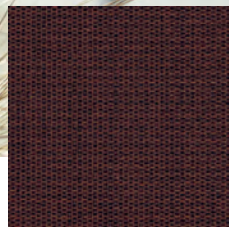

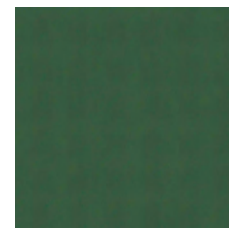

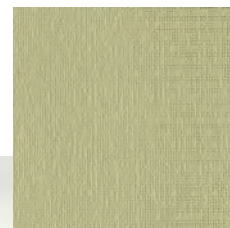

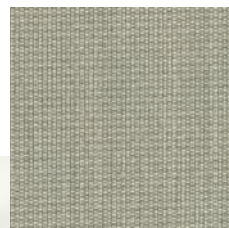

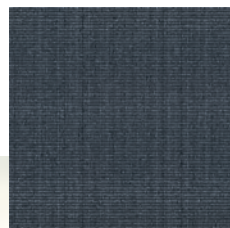

With its award-winning and compact design, VIVO TRILLIANT makes a visual statement, in perfect harmony with your building. Choose from a wide range of fabric designs, colors, and functions to configure your awning exactly the way you want it. Built to last, VIVO TRILLIANT also grows with your needs – thanks to its modular concept, it's ready for future innovations.

Developed by STOBAG – the Swiss design brand setting standards in sun and weather protection since 1964.

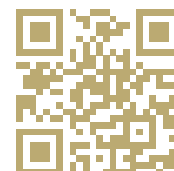

With a strong commitment to quality and innovation, STOBAG has expanded its global presence with a North American subsidiary and production site in Burlington, near Toronto, since 2010. This ensures that VIVO TRILLIANT is not only a product of Swiss engineering excellence but also locally supported for the North American market.
