

# WATER

Staying dry. For awning systems that can also be used in the rain, this specially equipped acrylic fabric with an extremely water-repellent coating is just the right choice. The STOBAG Advantage: Due to the external anti dirt protection impregnation, the fabric is perfectly suited for all-weather use in gastronomy, trade and private use.

**SHADE**

Reduces solar radiation and provides cooling shade for outdoor and indoor use.

**WATER RESISTANCE**

Rain-resistant in a short, light rainfall. To maintain the quality of the fabric, we recommend always rolling it up dry.

**UV PROTECTION**

Awning fabrics filter out UV rays. How high the filtering capacity of the fabrics is depends on various factors, such as color or fabric density.

Making living spaces more valuable together.
