

S T O B A G

Outdoor Living

Sun and weather protection
for house and garden.

WINDOW & FACADE

More environmentally friendly than any air-conditioning system:
Our facade awnings offer privacy and protection from the heat.

THE BENEFITS TO YOU AND THE ENVIRONMENT – GO GREEN

Window and facade awnings also allow you to regulate the amount of light that shines directly into your rooms. The insulating air cushion between the awning fabric and the window provides effective heat protection. These products are not only used for thermal insulation, they also save on energy costs.

BALCONY & TERRACE

Make your terrace or balcony your private oasis.

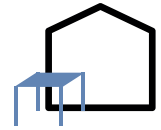

ENJOY THE OUTDOORS

People like to spend their time together on their terraces and patio – starting from the first warm rays of sunshine in spring until well into autumn. The right choice of sun and weather protection system ensures a pleasantly cool climate and excellent UV protection. Sometimes you don't just want protection from the sun when you're on the terrace or balcony but also privacy.

PERGOLA & PAVILION

Enjoy the outdoors in sunshine or rain: STOBAG terrace awnings and pavilions are durable and offer sun and weather protection.

INCREASE YOUR OUTDOOR LIVING SPACE

Terrace awnings offer many benefits for outdoor living. Frontal support makes the systems very stable. With sufficient incline and fitted with a waterproof cover they not only provide shade but are also ideal for use in the rain.

There are a number of product solutions to choose from depending on the particular application, desired dimensions and aesthetic appeal, even free-standing stylish pavilions.

CONSERVATORY SHADINGS

CONSERVATORY

Tropical temperatures in the conservatory? STOBAG awnings provide the optimal climate and a perfect atmosphere.

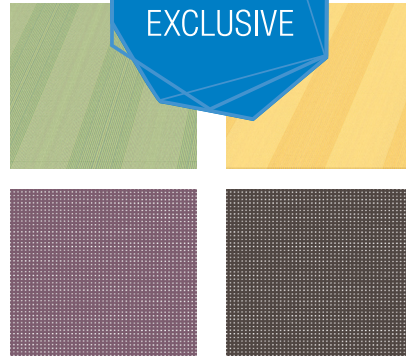

THE BENEFITS TO YOU

Sunrooms and conservatories are still very much the trend. However, the great challenge here lies in maintaining the perfect temperature and lighting. While the winter rays of sunshine can be enjoyed behind glass, they quickly become uncomfortable for inhabitants and plants in spring. To prevent your glass oasis becoming a greenhouse, STOBAG offers tailored conservatory awnings for the roof and windows.

AWNING ACCESSORIES & OPTIONS

More individuality and convenience with additional options.

INSPIRATION & HARMONY FRAME COLOURS

STOBAG profiles and frame components are powder-coated to ensure you can enjoy your sun and weather protection systems in the years ahead. This environmentally-friendly process offers effective protection for the structure against environmental and weather factors. The maximum possible degree of colour uniformity in an endless array is guaranteed by the highest quality standards.

10 Classic and 20 Lifestyle colors offers a choice to fulfill every wish.

COLORS & EMOTIONS COVER DESIGNS

By choosing a fabric from the STOBAG Collection from European quality weaving mills, you have opted for a top quality textile product. Let yourself be inspired and enticed by our extensive colour range and the special characteristics of our UV tested acrylic fabrics. Designers have an infinite range of colors and designs.

COMFORT & AMBIENCE AUTOMATION AND CONTROLS

We offer you exactly the comfort that you want from your individual awning system, from simple sun, wind or rain sensors to home automation integration. Whether you extend an awning via remote control, turn on atmospheric lighting or want to control the façade and conservatory shading by smartphone: Our reliable automatic systems master any situation.
