**EXCLUSIVE WORLDS OF FABRIC SEE
AND FEEL THE UNIQUENESS**

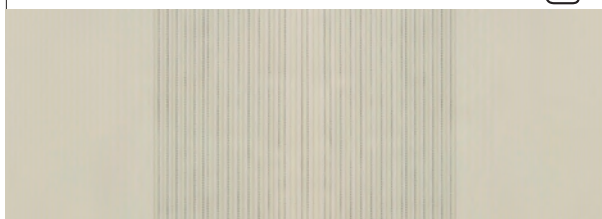

DESIGN

The 3-D effect of the fabric offers a special visual and touchable experience. The CBA fibers (Clear Brilliant Acrylic) stands for excellent properties and is particularly smooth in contrast to conventional materials. The result is a fabric with an extremely dense surface that is particularly dirt-repellent and whose colors therefore shine brighter and longer. The fabric is also particularly water-repellent and offers very high UV protection.

To further underline the uniqueness, 10 different EXCLUSIVE designs have been developed, which are exclusively available from STOBAG and offer an aesthetic treat.

 All roll widths are 120 cm.

The image shows a close-up of two pieces of perforated fabric. One piece is a light blue color and the other is a darker blue. Both fabrics have a consistent grid of small, circular holes. The fabrics are layered, with the darker blue one partially overlapping the lighter one. A white rectangular box is superimposed over the center of the image, containing the text 'UNOBSTRUCTED VIEW AND GLARE PROTECTION IN ONE' in a bold, black, sans-serif font.

Visual protection from the outside and yet the surroundings can be seen from the inside. The texture of the different and high-quality materials offer optimum privacy and sun protection for vertical shading. Depending on requirements, different opening degrees of light and air permeability are possible, thus ensuring an optimum room climate.

 Due to the specified roll width, various longitudinal or transverse welding seams can be produced, depending on the product and size.

UV PROTECTION

STOBAG only uses sun protection fabrics that have been tested according to current UV test standards (UV 801, EN 13758-1, AS/NZS 4399:1996). The materials tested provide 90–100 % protection against UV radiation. All specifications are guidelines and refer to adults, children's skin is much more sensitive.

THE VALANCE SHAPES

The recommended valance height is 15–20 cm, depending on the type of awning. The valance cut-out is adapted to the corresponding repeat width. For technical reasons, a manufactured valance subsequently can show repeat deviations of up to 6 cm. Important! Specify the valance number when ordering. Without specification, standard valance No. 50 is supplied.

THE EDGING TAPE FOR THE VALANCE

The valance has a hemmed edging tape to create a particularly beautiful appearance. Therefore it is important to always indicate the desired binding tape number when ordering fabrics. If no information is provided, the recommended edging tape as shown in this brochure will be used.

PERFECTLY COORDINATED

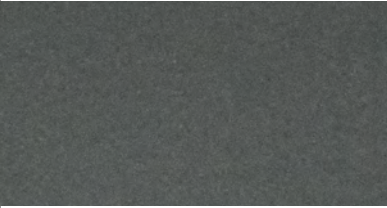

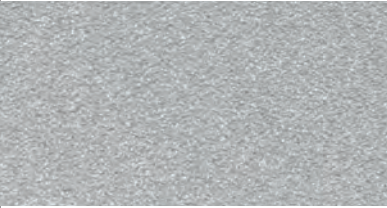

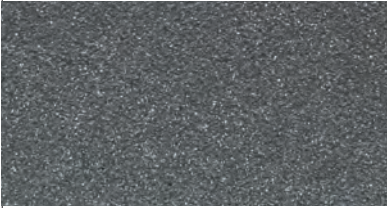

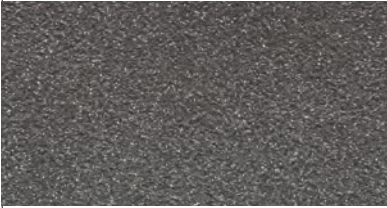

FRAME COLORS

Thanks to the wide range of colors and surfaces, the frame colors can be harmoniously matched to the fabric and its surroundings. With 14 CLASSIC- and 20 LIFESTYLE colors, as well as a variety of traditional RAINBOW colors, a wide range is available that leaves nothing to be desired. All profiles and frame parts are also powder-coated and offer the construction effective weather protection.
